

Lecture Handout #21: Nov 10

Distance Change from Velocity

Velocity of a toy wind-up car: starts at 2 m/s, increases steadily for 2 s

t	0	1/2	1
$v(t)$	2		
t		3/2	2
$v(t)$			10

Time interval	Underestimate	Overestimate	Difference	Actual distance:
1 sec	8 m			m
sec				
sec				

Total Change in Volume from Flow Rate

Time t (s):	0	1	2	3	4	5	Left-hand estimate:	_____
Flow rate $f(t)$ (l/s):	8	14	20	12	6	4	Right-hand estimate:	_____

Bacterial Population from Growth Rate

Bacteria grow at $f(t) = 1 + t^2$ million per hour in a 4-hour time period

$n = 4 \quad \Delta t = 1 \quad \text{Pop} \approx$ _____

$n = 8 \quad \Delta t = \frac{1}{2} \quad \text{Pop} \approx$ _____
